

# WILLIAM KOONZ

## AI Product & Design Engineer

Dallas–Fort Worth, TX · Open to US remote and select hybrid roles nationwide · [koonzwg@gmail.com](mailto:koonzwg@gmail.com) · 602-354-0598 · [github.com/koonzwg](https://github.com/koonzwg)

### PROFILE

AI product and design engineer with a founder/operator background spanning product management, design, engineering, AI systems, growth, and go-to-market. Takes products from concept and positioning through UX/UI, technical implementation, launch, and iteration. Founded and shipped two consumer iOS products, led product design across web and DeFi products, built quantitative trading systems, and founded and exited a service business.

### EXPERIENCE

**SHADO** — Founder · AI Product & Design Engineer Apr 2026–Present

- Founded, designed, and shipped a live [AI-guided reflection app for iOS](#), reaching approximately 220 users in its first months after launch.
- Own end-to-end product development across strategy, Figma UX/UI and design systems, AI behavior and personalization, SwiftUI implementation, Supabase/Postgres architecture, web experiences, App Store release, and ongoing iteration.

**PRODUCT DESIGN STUDIO** — Product Designer Jul 2024–Mar 2026

- Led product design across web applications, crypto/DeFi products, and early-stage software, translating ambiguous requirements into user flows, interaction models, design systems, high-fidelity prototypes, and developer-ready specifications.

**FINALFORM — AI CALORIE TRACKER** — Founder · Product Designer & Developer Mar 2024–Aug 2025

- Designed and shipped an AI-powered iOS calorie tracker used by approximately 200–300 people, enabling food logging through photos, voice, and conversational text using Swift/SwiftUI, Supabase, and OpenAI APIs.

**GOODKLEEN** — Founder Mar 2023–Feb 2024

- Founded and operated a residential cleaning company across positioning, customer acquisition, booking, contractor scheduling, and service delivery; designed the brand and Webflow site, integrated BookingKoala, and exited through a transfer of the customer base and operations to two contractors.

**METAPHARM** — Founder & Product Lead Oct 2021–Mar 2022

- Founded and led pre-launch product development for a play-to-earn game and NFT ecosystem, coordinating approximately 12–15 contributors and external partners across product, blockchain/web engineering, game design, illustration, branding, paid growth, and community.

**INDEPENDENT QUANTITATIVE CRYPTO TRADER & STRATEGY DEVELOPER** 2017–2021 · Consulting  
2018–2020

- Designed low-liquidity Bitcoin-pair strategies using relative volume, trade velocity, order-book depth, and bid/ask imbalance to generate weighted directional confidence signals and inform position sizing.
- Built cross-exchange and triangular-arbitrage and momentum systems using Python, Node.js, CCXT, WebSockets, REST APIs, and exchange infrastructure; progressed from live paper testing and manual validation to automated execution, position limits, and trailing stops, while building strategy and automation systems for private traders and investors.

### EDUCATION

**4Geeks Academy** — Full Stack Software Development Completed Dec 2022

### SKILLS

#### Product & management

Product strategy & vision · Product management · 0→1 development · Product discovery · Roadmapping · Prioritization · Requirements · Experimentation · Cross-functional leadership

#### Design & creative

UX/UI · Interaction design · User flows · Design systems · Prototyping · Figma · Branding · Creative direction · Developer handoff · Midjourney

#### Engineering & platforms

Swift · SwiftUI · Python · JavaScript · TypeScript · Node.js · React · Next.js · SQL · PostgreSQL · Supabase · REST APIs · WebSockets · Git/GitHub · Webflow

#### AI & systems

AI-native product design · LLM integration · OpenAI APIs · Prompt & behavior design · Memory & personalization · Agent/workflow design · AI-assisted engineering

#### Growth & business

Go-to-market strategy · Positioning · Customer acquisition · Sales · Growth experimentation · Funnel optimization · Marketplace operations · Contractor/vendor management
